

Entering Grade 5 Summer 2020 Math Assignment

1. Print the summer math pdf.
2. Do a little bit of math each week. Do not wait until the end of the summer to do your work. You will have a better learning experience if you do a little math throughout the summer.
3. Do your best work, but do not feel stressed. We will go over any questions you may have at the start of fifth grade.
4. For extra fifth grade prep, you may work on Khan Academy.
